

Errata for ***Modern X86 Assembly Language Programming***

Page 19, in Table 1-10. *Binary Arithmetic Instructions*, these two lines should read:

- adc Adds the source operand, destination operand, and the state of EFLAGS.CF.
 This instruction can be used for both signed and unsigned integers.

- Sbb Subtracts the sum of the source operand and EFLAGS.CY from the destination operand.
 This instruction can be used for both signed and unsigned integers.
